	GHG Emission Reduction Targets for FY2030
Scope 1+2	-25%(from FY2020)
Scope 3	-13%(from FY2020)

Scope1 : Direct greenhouse gas emissions from sources that are owned or controlled by the company.

- Scope2 : Indirect greenhouse gas emissions from the use of electricity, heat and vapor supplied by other companies.
- Scope3 : Other indirect greenhouse gas emissions which are a consequence of the activities of the company, but occur from sources not owned or controlled by the company.

Under the basic philosophy of "creating and preserving a people-friendly and earth-friendly environment," our group strives to prevent environmental pollution, reduce environmental impact, and preserve the environment. Recognizing that responding to sustainability issues, including climate change and targets for reducing greenhouse gas emissions, is an important management one, we will promote initiatives aimed at "realizing a sustainable society."

- ※1 SBTi (Science Based Targets initiative) : The SBTi is a global body enabling businesses institutions to set ambitious emissions reductions targets in line with the latest climate science.
- 2 SBT (Science Based Targets) : These are greenhouse gas emission reduction targets set by companies to meet the goals of the Paris Agreement; 5-15 years from now as the target years.
